Projects

Reve website and admin panel (06/2023 - Present) <https://dev-reve.exmyb.com/en>

This business focuses on providing an online platform that connects individuals with a wide range of real estate properties. It offers a comprehensive database of listings, empowering users to find their ideal homes, commercial spaces, or investment properties.

- Architected a e-commers Next.js 13 application with OAuth-based authentication and Google Maps API integration.
- Developed an efficient admin panel using React with the latest React Router DOM version for improved user experience.
- Established and architected a robust Redux store, allowing for the efficient management of complex states across the application.

LifeGuru (04/2023 - 06/2023) lifeguru.app

Designed and developed , a website offering accurate predictions, detailed Kundli PDFs, Today's Horoscope, sourced from the Best Online Astrologers.

- Leveraged Next.js app router to ensure a seamless and responsive user experience, improving overall website performance.
- Implemented robust SEO strategies to enhance visibility and search engine ranking, resulting in increased organic traffic.
- Integrated Google Analytics to monitor user behavior, track key performance metrics, and make data-driven decisions for further optimization.
- Collaborated closely with astrologers and content creators to curate and present high-quality astrological content.

My Gerry (02/2023 - 04/2023)

At My Gerry, a Canadian company dedicated to fostering connections between families and their loved ones in care homes, I have been actively involved in the development of a comprehensive web portal designed to streamline the management of meetings, events, and family member contacts for care homes.

- Architected and implemented the authentication flow for enhanced security.
- Designed and integrated a versatile modal manager to improve user interaction.
- Orchestrated seamless API integrations to enhance data connectivity.
- Implemented an interceptor system to efficiently manage access and refresh tokens.
- Crafted data tables utilizing Material UI for a polished user experience.
- Established a robust Redux framework to centralize state management.

Microsite Builder (06/2022 - 02/2023) <https://dev.createwith.botshot.ai/onboarding>

- It is an application that helps businesses in the hospitality industry to bring their business online within 10 minutes with help of a website that can be tailored by business user according to their taste.
- Worked as Front end developer on this project , used **NextJs , Redux Toolkit ,Type script ,Material UI ,React Hook Form ,CK Editor ,React Multi Carousel** and many more technologies for this project.
- My contribution to this project is making pixel perfect UI designing ,creation of multiple components , creation of countless forms ,integration of forms with microsite using redux toolkit ,created dynamic filed renderer and much more.

Transaction Feedback Website (04/2022 - 06/2022)

- It is a Feedback System with customized feedback forms as per requirement of hotels.
- Used libraries like **React hook Form, React Query and Redux Toolkit**
- My role in this project was to create material components such as text fields ,select , file upload ,radio buttons as per as UI requirement of project.

FCT (01/2022 - 04/2022)

- FCT is a Canada based company which provides insurance and real estate services in Canada
- Tech stack used for this project is **ReactJs, HTML5, CSS3 ,Material UI ,Redux Toolkit** and much more.
- For me a key learning for this project is how to deal this client and manage things accordingly
- Implemented features some major features like **Google Captcha ,Stripe Payment Gateway.**

Zumin (07/2021 - 01/2022)

At Zumin, a company specializing in household renovation services in Canada, I played a key role in developing their marketing website. Utilizing the Next.js framework, I contributed to various aspects of the project.

- Created a range of marketing pages including Home, About Us, Gallery, and more, using Next.js to ensure efficient and performant rendering.
- Developed and integrated various forms and responsive UI components, such as cards, backdrops, modals, drawers, and diverse input fields, to enhance user interaction and engagement.
- Prioritized accessibility by implementing the Wave tool to ensure that the website was inclusive and compliant with accessibility standards, providing a seamless experience for all users.
